

II. SPECIFICATION AMENDMENTS

Please amend the paragraph on page 13, lines 3-17 as follows:

For example, printing/copying and post processing instructions for a particular print job may be conveyed by printer controller 445 to network device 420₁ which may control the first printing operations. The print job may be routed to various printing/copying modules 410₁ ... 410₆ according to the printing operations to be performed. As the print job progresses through each of its printing operations the associated network device 420 may receive post processing instructions from the network device 420 controlling the previous printing operation, and may attach additional post processing instructions. The print job and its post processing instructions may be passed from network device 420 to network device 420 until reaching the last printing/copying module, for example 410₆ and its corresponding network device 420₅.
